

SEO & Website Audit – Myntra

Introduction

This SEO and Website Audit was conducted for Myntra to evaluate its basic SEO elements, content structure, page performance, and technical aspects. The audit identifies key strengths and areas for improvement and provides prioritized recommendations to improve search visibility and user experience.

SEO Title

Myntra: Online Shopping for Women, Men, Kids Fashion ...

Meta Description

Online Shopping Site for Fashion & Lifestyle in India. India's Fashion Expert brings you a variety of footwear, Clothing, Accessories and lifestyle products ...

Target Keywords

- Online Shopping
- Fashion & Lifestyle
- Women Fashion
- Men Clothing
- Kids Fashion
- Footwear
- Clothing
- Accessories

Content Structure

Myntra organizes its website content into different product categories such as women's fashion, kids' clothing, kurtis, beauty products, ethnic wear and

western wear. This helps users easily navigate to their required product categories.

Observation:

The website has a clear category-based structure that supports easy navigation and product discovery.

Page Performance

According to PageSpeed Insights, Myntra's Core Web Vitals assessment did not pass. The mobile results show an LCP of 4.6 seconds, INP of 379 ms and CLS of 0.21.

Technical SEO – HTTPS

Myntra uses HTTPS, which provides a secure connection between the website and users.

Status: Good

Mobile Performance

The PageSpeed Insights mobile assessment shows that the Core Web Vitals assessment failed. The main areas for improvement are loading speed, interaction responsiveness, and layout stability.

Key Findings & Recommendations

1. Improve page loading speed by optimizing images and website resources.
2. Improve interaction responsiveness to make the website react faster to user actions.
3. Reduce layout shifts so page elements remain stable while loading.
4. Improve mobile performance for a smoother user experience.
5. Monitor Core Web Vitals regularly and optimize pages based on performance results.

Conclusion

The SEO and Website Audit shows that Myntra has a clear website structure and secure HTTPS connection. However, improvements are needed in page speed, mobile performance, interaction responsiveness and layout stability. Implementing the recommended improvements can help provide a better user experience and overall website performance.
